

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application. The claims find full support in the original disclosure.

**Listing of Claims:**

1. **(Currently Amended)** A medication delivery system comprising:

~~an arrangement~~ a plurality of indicia coded syringes for delivering pre-determined dosages of medication; said plurality of indicia coded syringes having pre-determined dosages of medication therein and indicia of said pre-determined dosages of medication thereon;

~~said arrangement having indicia indicating the dosage to be delivered;~~

~~an arrangement~~ a storage unit comprising medication drawers for organizing said plurality of indicia coded syringes, said medication drawers having compartments therein, the compartments having indicia corresponding to said indicia of said pre-determined dosages ~~delivery arrangements;~~ and

~~said organizing arrangement having indicia corresponding to the indicia of said delivery arrangements~~

wherein said indicia of said pre-determined dosages of medication correspond to indicia displayed by a glucometer upon a determination of a blood glucose level.

2. **(Currently Amended)** The medication delivery system of Claim 1, wherein said indicia of said pre-determined dosages of medication ~~is~~ are color-based and further wherein said pre-determined dosages of medication comprise predetermined dosages of insulin.

3. **(Currently Amended)** The medication delivery system of Claim 3, ~~wherein said indicia is a color selected from the group essentially consisting of blue, yellow, pink, green, red, and purple~~ further comprising:

color caps configured to cap needles of said plurality of indicia coded syringes.

4. **(Currently Amended)** The medication delivery system of Claim 1, wherein said indicia of said pre-determined dosages of medication ~~is~~ are tactile based.

5. **(Currently Amended)** The medication delivery system of Claim 1, wherein said indicia of said pre-determined dosages of medication ~~is numerically based~~ are selected from the group consisting of colors, numbers, letters, graphic symbols, tactile symbols, and machine readable bar codes.

6. **(Currently Amended)** An apparatus for delivering medication comprising:

a barrel containing a pre-determined dosage of medication;

a color-distinct plunger rod, slidably mounted within said barrel, ~~and extending from the plunger end of said barrel; and~~

a needle ~~for delivering medication~~ extending from the a needle end of the  
said barrel for delivering said pre-determined dosage of medication;

~~said apparatus having indicia indicating the dosage of medication to be~~  
~~delivered~~ wherein said color-distinct plunger rod corresponds to said  
predetermined dosage of medication and a color displayed by a glucometer  
corresponding to a blood glucose reading.

7. **(Currently Amended)** The apparatus of claim 6, wherein said ~~indicia is color~~  
~~based~~ predetermined dosage of medication comprises insulin.

8. **(Currently Amended)** The apparatus of claim 6, ~~wherein said color is selected~~  
~~from the group essentially consisting of blue, yellow, pink, green, red, and purple~~ further  
comprising:

a color cap configured to cap said needle and having a color corresponding  
to said color-distinct plunger rod.

9. **(Cancelled)**

10. **(Currently Amended)** The apparatus of claim 6, wherein said ~~indicia is~~  
~~numerically based~~ color-distinct plunger rod corresponds to a predetermined dosage of  
medication indicated on at least one of a color-coded medication chart and a color-coded  
medication drawer compartment.

11-20. **(Withdrawn)**

21. **(New)** An apparatus for delivering medication comprising:

a barrel containing a pre-filled dosage of insulin;

a plunger rod slidably mounted within said barrel; and

a needle extending from a needle end of said barrel for delivering said pre-filled dosage of insulin;

wherein said apparatus has an indication thereon corresponding to said pre-filled dosage of insulin and a corresponding indication displayed by a glucometer; and

wherein said pre-filled dosage of insulin comprises a correct dosage of insulin for a blood glucose level.

22. **(New)** The apparatus for delivering medication according to claim 21, wherein the apparatus has an indication thereon selected from the group consisting of a color, a number, a letter, a word, a graphic symbol, a tactile symbol, and a machine readable bar code.

23. **(New)** The apparatus for delivering medication according to claim 21, wherein the indication comprises a color.

24. **(New)** The apparatus for delivering medication according to claim 21, wherein the indication is tactile based.

25. **(New)** The apparatus for delivering medication according to claim 23, wherein the a plunger rod comprises a color-distinct plunger rod, and wherein a color of the color-distinct plunger rod corresponds to the correct dosage of insulin for a blood glucose level.

26. **(New)** The apparatus for delivering medication according to claim 21, further comprising:

an expiration label.

27. **(New)** The apparatus for delivering medication according to claim 23, wherein the color corresponds to a color indicating a blood glucose level displayed on a color-coded medication chart.

28. **(New)** The apparatus for delivering medication according to claim 23, wherein the color corresponds to a color indicating a blood glucose level displayed on a color-coded medication drawer compartment.

29. **(New)** The medication delivery system of Claim 1, wherein said storage unit is sized to allow placement in a refrigerator.

30. **(New)** The medication delivery system of Claim 1, wherein said medication drawers have indicia corresponding to a time of day.

31. **(New)** The medication delivery system of Claim 1, wherein said compartments are arranged to store the plurality of indicia coded syringes in dose order.
